

“Italian and Portuguese marine and maritime clusters: best practices and experience exchange”

- Synergies between the Hub Azul Portugal and the Italian clusters

La Spezia, 8 June 2023, h 14:00 – 16:30

An increasing number of countries have already placed blue economy at the core of their governmental strategies, and the national marine and maritime clusters’ role is becoming increasingly fundamental on various aspects.

The blue economy management differs from country to country from various point of view, including but not limited to: research and innovation, business support through targeted industrial policies and financial support, training at various levels, etc.

During this session many experts coming from National Blue Economy Clusters in Italy and Portugal will share their models and experiences in all relevant aspects, with the aim to highlight differences and facilitate the exchange of best practices.

AGENDA

- 14.00-14:30 *Registration*
